

Miran Čeh is scientific advisor at the Department for Nanostructured materials and the Head of Center for Electron Microscopy and Microanalysis at the JSI. He is professor at the Chemistry and Chemical Technology Department at the University Maribor, visiting professor at the Sabanci University and lecturer at the Jožef Stefan Postgraduate School. He is employed at the Jožef Stefan institute since 1982. After receiving his doctorate in 1991, he specialized in the field of electron microscopy at the Max-Planck-Institut für Metallforschung in Stuttgart and at NIST in Gaithersburg. Main scope of his work is structural and chemical characterization of nanostructures in oxide materials using various electron microscopy techniques. Miran Čeh is member of the European Microbeam Society (EMAS) board, past president of the Slovenian Society for Microscopy, Slovenian delegate to the ESFRI (European Strategy Forum on Research Infrastructures) and member of the ESTEEM2 project. He has been the chairman of two Multinational Congresses on Microscopy (MCM), organized by SDM and JSI, and is a member of advisory boards of numerous international congresses on electron microscopy. His bibliography includes 90 scientific papers, 8 professional papers, 18 invited lectures at conferences, 18 invited lectures at foreign institutions, 77 conference papers, more than 120 conference abstracts and 4 patent applications.
